Summary CV

Brig Rehan Uddin graduated from Army Medical College in December 1983 and got commissioned in Armed forces. He did his fellowship in Dermatology in 1994 and included in the pioneers fellow of Dermatology in Pakistan. He is appointed regularly as a paper setter, paper assessor and clinical Examiner of the subject by CPSP and remained a member of the faculty of Dermatology of CPSP.

Portfolio

He played a highly constructive role in every Institute wherever he served. In CMH Quetta, he accredited the Dermatology Department for complete FCPS II training in 2001, which was the first unit in Baluchistan recognized for training of Dermatology.

In PNS SHIFA from 2004 to 2011 he played a pivotal role in transforming the Dermatology Department as a state of Art post graduate teaching Unit and made it a central hub of academic activities for Dermatology in Karachi. This may be depicted by the fact that prestigious universities like AKU Karachi (Aga Khan) sent its FCPS trainees of Family Medicines routinely to PNS SHIFA and he trained 23 FCPS Trainees of AKU. He also produced PNS SHIFA Magazine as Chief Editor in 2009.

He has the honor of taking the initiative of planning and organizing the first ever National Intensive preparatory course for Dermatology Candidates appearing in MCPS, MD and FCPS Examination of its kind in April 2005. The course is being run twice yearly in April / May and Oct/ Nov regularly since then. Till date 17 courses have been conducted and more than 600 candidates from all over the country have benefited from this unique course which is considered as the key to understand essentials of Dermatology by students in Pakistan.

Brig Rehan has special interest in innovating teaching techniques which he utilizes in each course to emphasize and transfer learning points to students. This passion landed him in medical education and he acquired a Masters in Medical Education by CPSP in 2012. This qualification further enhanced his innovations. He is a pioneer med educationist in Pakistan who procured and utilized a learning response systems to engage audience during his lectures/ sessions/ workshops. This innovation has become his recognition mark as a medical educationist par excellence in the country.

Recognizing his potential to help other teachers in spreading knowledge, he planned and started faculty development programs in CMH Lahore Medical College in collaboration with his colleagues Brig Aqeel Safdar and conducted 10 workshops monthly. The workshops were designed for different aspects of Medical Education. This program's success became word of mouth and he was invited for Faculty Development of QIMS, Army Medical College Rwp, AFGMI, FU Medical College Rwp, SHIFA International Medical College Islamabad, University Medical College Faisalabad, SIMS Lahore, Fatima Memorial Medical College Lahore and Shalamar Medical College Lahore. His major interest was to share teaching strategies in light of principles described in Quran. He also helped students of above mentioned colleges by guiding and sharing with them modern strategies of learning medical education with minimum efforts to learn effectively.

He also regularly conducted essential supervisory workshops designed to train post graduate supervisors of CPSP to train and assess their undergraduate and post graduate students. He specifically addresses the subjects of **1. How do we learn? 2. How should we teach? 3. How should we assess the learned competence (assessment)? and 4. How should we plan this program? (Curriculum) 5. How to get time to address previous questions? Time Management).**

He created and organized the **Time management workshop** and is regularly conducting it each Thursday in CMH Lahore Conference room, for faculty and students. He was invited to conduct the same workshop for post graduate students of SIMS and Ganga Ram Hospital Lahore.

Portfolio

Recently he created and organized an awareness program for skin patients with the name of “EDUTAINMENT” at CMH Lahore Medical College Auditorium on Saturday 13th Dec 2014. Approximately 600 people, which included senior military and civil officials, journalists (both print & electronic), celebrities and philanthropists attended the event in addition to general public. The theme of the program was “Society’s role for skin patients”

The program was designed to convey 3 points / messages for the society.

1. There is **no Institute of Dermatology** in the country and it’s a dire need to develop them in each major city as skin diseases are the 3rd most common problem in any OPD.
2. The common and treatable skin diseases remain undiagnosed and keep on flourishing because doctors do not have adequate training in skin departments and this problem can be solved if **PMDC includes Dermatology as a separate subject in MBBS Curriculum.**
3. In other countries there are **help group organizations** to take care of patients of specific diseases. The audience were motivated to organize and develop such social groups.

The program consisted of 12 small presentations (5 minutes each, delivered by specialists, house officers and medical students) each conveying a specific message for the audience. The program was highly appreciated which is depicted by following excerpts from media comments.

1. The **NEWS Lahore** 15th Dec 2014 Lahore p 14 stats. “They engaged audience throughout the program, by showing numerous eye opening pictures and video clips. During this process they subtly motivated the audience to play their role as a society by touching their hearts. The program was unique in its own class. The technique used by each presenter was marvelous and the college and department of dermatology deserve full marks for their thoughtfulness and wowing so varied ideas into three concrete messages. “

2. **Pakistan Observer** Lahore 15th Dec 2014 p 8 wrote “The creators and presenters utilized novel techniques which they labelled as edutainment in order to convey their messages”.

3. The **Nation Lahore** dated 15th Dec 2014 p 9 said “Dermatology Department CMH Lahore Medical College organized an interesting and innovative program and engaged the audience throughout the program”

4. **Pakistan Lahore** 15th Dec P 16 commented “چھوٹے چھوٹے لیکچرز جن کا دورانیہ صرف پانچ منٹ کا تھا . یہ سارے لیکچرز زیر تربیت نوجوان ڈاکٹروں نے حاضرین کو مسحور رکھتے ہوئے دیے۔”
